

To Whom It may Concern:

On May 4, 2023 I examined Osirus, a pet goat belonging to Maria Djordjic and Jesse Silnica. Osirus is a 3 year old castrated La Mancha goat. There were no health concerns for Osirus today, and he was vaccinated against Rabies and Clostridium diseases. We regularly see Osirus for preventative health care and it is clear that he is one of the family. We have a few clients who have pet goats, and Osirus is one of them. He will not be used for breeding or consumption, and he is well loved and taken care of by his owners, similar to how many of the dogs and cats at this practice.

Please contact me if you have any additional questions.

Thank you,
